DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1 through 9 and 13 through 21 are drawn to a plasma processing apparatus, classified in class 257, subclass 48.
- II. Claims 10 through 12 and 22 through 24 are drawn to performance validation system, classified in class 710, subclass 20.
- III. Claims 25 through 42 are drawn to inspection method, classified in class 438, subclass 18.

The inventions are distinct, each from the other because of the following reasons:

Inventions Group I, and Group II are related as method and device for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process, (MPEP § 806.05(e)). In this case the apparatus claimed in Group I can be inspected by and entirely different system than that claimed in Group II. Also, the apparatus can be inspected by entirely different method than that claimed in Group III.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
